Release Date: 2017/03/14

Contour firmware update

Notice: This firmware update will turn off the power saving mode. Please note this will reduce the length of time your controller can operate.

1. **Please download the Firmware Update AP from our website first:**
   http://www.ttesports.com/Controllers/203/CONTOUR/productPage.htm?a=a&g=ftr
2. **Before using the contour, please open the latest Firmware Update AP as follows:**

3. **Please plug in your contour after opening the software. It will update the firmware automatically as follows:**

Release Date: 2017/03/14

Contour firmware update

4. **If your contour firmware doesn't update automatically after 10 seconds, please press the power button again.**
5. **Finished**

6. **Please click "FW Ver" and check the FW version:**
