Win 10 | Win 8.1 Installation

Installing the Command Center Software

- 1. Visit the product page and download the latest Command Center software.
- 2. Follow the onscreen prompt to complete installation.
- 3. Restart you PC.

4. From the system tray, select the Tt eSPORTS Command Center icon to enter software.

Registering your fingerprint:

[STEP 1]

Once loaded, move your mouse curser to the tab box named 'Fingerprint' to begin registering your fingerprint with the BLACK FP.

Note: first time registration requires entry of Windows password.

[STEP 2] Select desired fingerprint for registration.

Note: a maximum of 10 fingerprints can be set at a time

[STEP 3]

Place selected finger on the fingerprint sensor of the BLACK FP and lift and rest repeatedly.

Note: if registration of fingerprint fails, please reattempt the process again until successful.

[STEP 4]

Upon successful registration of your fingerprint, a message notification will pop up to notify that the registration has now been successfully completed.

		Right Button	New New York Concerns
		Profile Switch [+]	Performance
D.		Rotate [+]	Light Option
		Totale [·]	Link to Program
V I	500D	Forward	
		Backward	- 153

2. Follow the onscreen prompts and enter the fingerprint registration section

3. Select the fingerprint you wish to delete and then press 'Remove' Note: removal of only registered fingerprint will require your Windows password as confirmation.

Note: If you have not removed your fingerprint registration data before you uninstall the Security Center and/or Command Center software, please refer to 'Deleting fingerprint identification from your windows system' in the appendix section.

Win 8.1 & 10 Security Center Installation

Installing the Security Center Software for

Windows 8.1 & 10

- Windows 8.1 & 10 login
- Website login
- File and folder encryption

1. Visit the product page and download the latest Security Center software.

2. Follow the onscreen prompt to complete installation (Chrome users will be prompted to install a 'Chrome Extension' in order to use the full security center features.)

- 3. Restart your PC.
- 4. Upon restart an automatic screen will pop up to register your security preferences.

5. If not, at the start screen, type security center, and then select security center to open the application

6. Click the 'Get Started' button

Selecting Your Security Center

Select a Security Center method (PIN, password, or fingerprint reader) for logging on to Windows and your password-protected website accounts, and then click Next.

Selecting PIN Method:

Enter your desired 4-digit pin

Security Center						
	Create your PIN		1 GHI 4	ABC 2 JKL 5	DEF 3 MNO 6	
			4 PQRS 7 0	э тиv 8	wxyz 9

Pin registration successful

Selecting Password Method:

Select desired secret question and enter desired answer and click submit.

Password registration completed.

Selecting Fingerprint Reader Method:

Select setup my fingerprint reader.

For first time registration selects 'Use Windows Password' to enter.

Enter your current windows password.

If fingerprint has been previously registered with the Command Center software, press exit.

Note: one fingerprint can only be registered to one account. If a fingerprint is already registered to another account, a popup message will appear to inform you to register

another.

It is recommended that you register more than one fingerprint, if not, simply select

'yes' to exit.

Registration is complete

Deleting your fingerprint registration data

To delete your registered fingerprint, please follow these steps:

Deleting from the Security Center software

1. Open the Security Center and enter "Set up my fingerprint reader"

2. Go to "My Settings" and select "Modify."

Registering Website Credentials in Security Center

Instantly open your browser and automatically log on to your password-protected website accounts by registering the website accounts and credentials in the Security Center. Supported browsers include Internet Explorer, Firefox, and Chrome.

Registering a website creates an icon that represents the website account you are registering in Security Center. Registering a website account also securely stores the website name, web address, username, password, and other applicable information associated with the website account in Security Center.

Note: Passwords containing the "+" symbol may not be saved using Security Center.

Registering Website Accounts

Having completed set up of the Security Center, you can register your website accounts.

Open a web browser and navigate to a website where you have a password protected account.

Log on with your username and password for the website account.

0.	Remember this password?	
-12	Do you want Security Center to remember your password for this site?	
	Next time, just use your PIN, fingerprint, or Windows logon password to get into this site.	
	Yes	Ask me later

A Security Center screen will display to request 'Remember this password.' Select yes.

My Launchsite records all saved accounts.

The next time you visit the password protected site, automatic 'Touch to sign in' dropdown box will activate and you simply use your registered fingerprint.

Deleting your Security Center Account

Follow these steps to remove the Security Center:

Caution:

Make sure that you know your Windows User Account password before deleting your Security Center. Once the Security Center is deleted, Windows requires your Windows User Account password to unlock the computer. Deleting your Security Center also deletes your Security Center Settings, registered websites, and website account logon information.

- 1. Click the Security Center icon in the desktop taskbar, then log on using your PIN, password, or fingerprint.
- 2. Click the My Settings icon to open the My Settings screen, and then click Delete.
- 3. Click Confirm

Your Security Center account is now deleted. You can set up a new Security Center account by following the steps in Setting up Security Center.

File and Folder Encryption

To encrypt a file or folder, simply select the desired file/folder and right click.

Open		
Print		
Edit		
使用 Windows D	efender 掃描	
Open with		2
Security Center E	ncrypt File(s)	
Share with		
Restore previous	versions	
Send to		
Cut		
Сору		
Create shortcut		
Delete		
Rename		
Properties		
		-
10		

From the dropdown menu, select 'Security Center Encrypt File(s)' which will bring up the authentication method selected originally.

Depending on the security method you choose earlier, user must confirm encryption by either pin, password or fingerprint reader method. Once confirmed, user will then be asked to input a 'Backup File Password' just in case user is unable to access file via the original method.

Security Center will create encryption k	
Please save this encryption key in a si	ate place.
C:\Users\syna\Documents*.opk	
Password:	
Confirm Password :	
ОК	

Save the backup security key file to desired location.

The file/folder encryption process will begin and once completed, your file or folder will display a padlock icon indicating that the file is now secure,

Accessing Encrypted Files & Folder

Simply double click on the encrypted file or folder where you will be prompted for authentication.

Once authentication is successful you will have access.

🔥 Folder 1	-	×
← → ✓ ↑ 8 > Folder 1 ✓ 0		ρ.

Cuick access Desktop Downloads Fie 1.bct Fie 1.bct Kuightshot Music Kuightshot Music Kuightshot Kuightshot Music Kuightshot Kuightshot		
Screenshot Videos ConeDrive		
 This PC Desktop Documents 		
♣ Downloads Music ➢ Pictures Videos		
Local Disk (C:)		

Note 1: Files in protected folders can be edited without the need to reapply password protection. Simply double click the file in the folder for access.

Note 2: If the file is moved outside of the protected folder, such as the Desktop, the file will need to be re-protected again.

If the Security Center is left open and idle for over 1 minute, the session will automatically expire and as a security precaution, you will be required to login again

with your authentication.

Win 7 Installation

Command Center Software Installation

NOTE:

1. In order to use the BLACK FP gaming mouse for WIN7, you must create a new administrator user account on your system and use that specific account with the BLACK FP gaming mouse.

2. Compatible with Windows 7 Service Pack 1, Windows Server 2008 R2 Service Pack 1

1. Checking installation of biometric device success

After downloading and installing the Commander Center software, please open your device manager to check if the biometric device has been installed successfully.

2. Setting up the biometric device for system login.

After setting up the device, please go to **\Control Panel\Hardware and Sound\Biometric Devices\Change Settings and secret "Biometrics on"** in order to login to Windows 7 with the biometric fingerprint sensor.

	×
Control Panel + Hardware and Sound + Biometric Devices + Change settings + 47 Search Control Panel	Q
Change biometric settings	
These settings control biometrics and fingerprint logon for this computer. If you want to delete biometric data and fingerprint logon information for all users of this computer, turn off biometrics.	
Biometrics on	
Allow users to log on to Windows using their fingerprints	
Allow users to log on to a domain using their fingerprints	
Biometrics off	
Turning off any of these settings will delete saved fingerprint logon information. Turning off biometrics also deletes fingerprint records for all users.	
Save Changes Cancel	

3. Using the Commander Center to set up your fingerprint login

Enter the Commander Center software and follow the onscreen prompts to complete the installation.

Fingerprint	Profile 1 Profile 2	Profile 3 Profile 4 Profile 5
